

LibX 2.0 (beta) Intro

Chrome:

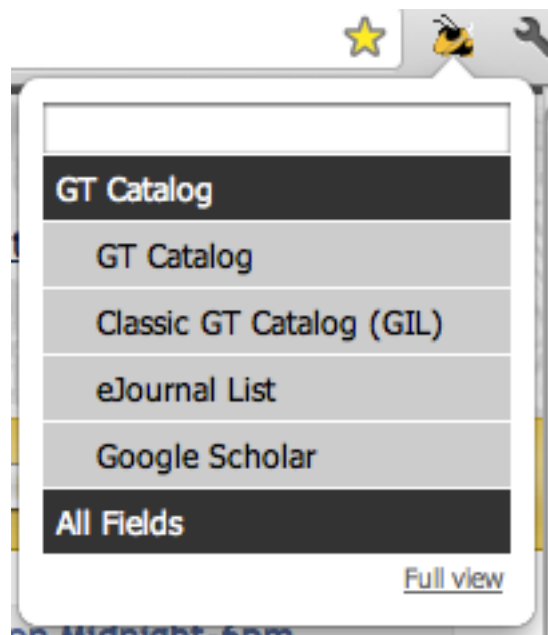

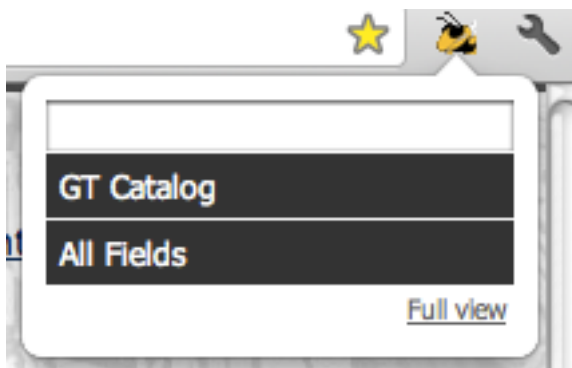

<http://libx.org/releases/gc/libx2-latest.crx?edition=6690C001>

Firefox:

<http://libx.org/releases/ff/libx2-latest.xpi?edition=6690C001>

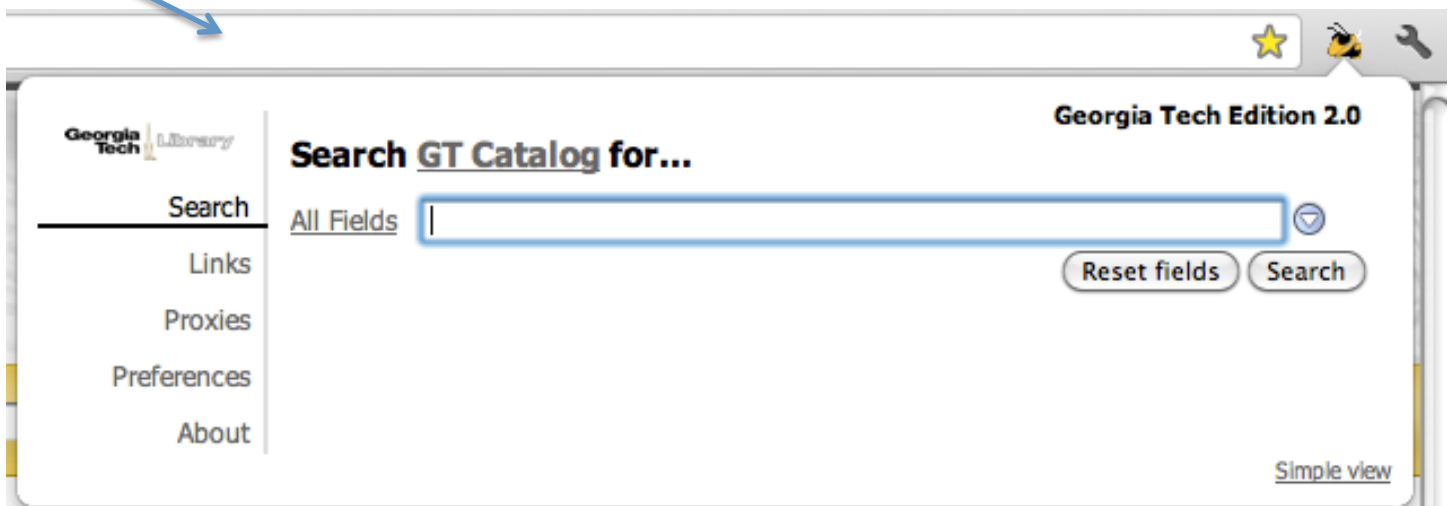

LibX 2.0 is quite different from previous versions of LibX. The main difference is the toolbar is no longer used. Now all of the functionality is contained under the GT cue icon:  located on your Google Chrome or Firefox Toolbar. The Right-click menu is still available.

When you click on the GT cue icon you will see either the “Simple view” or the “Full view”

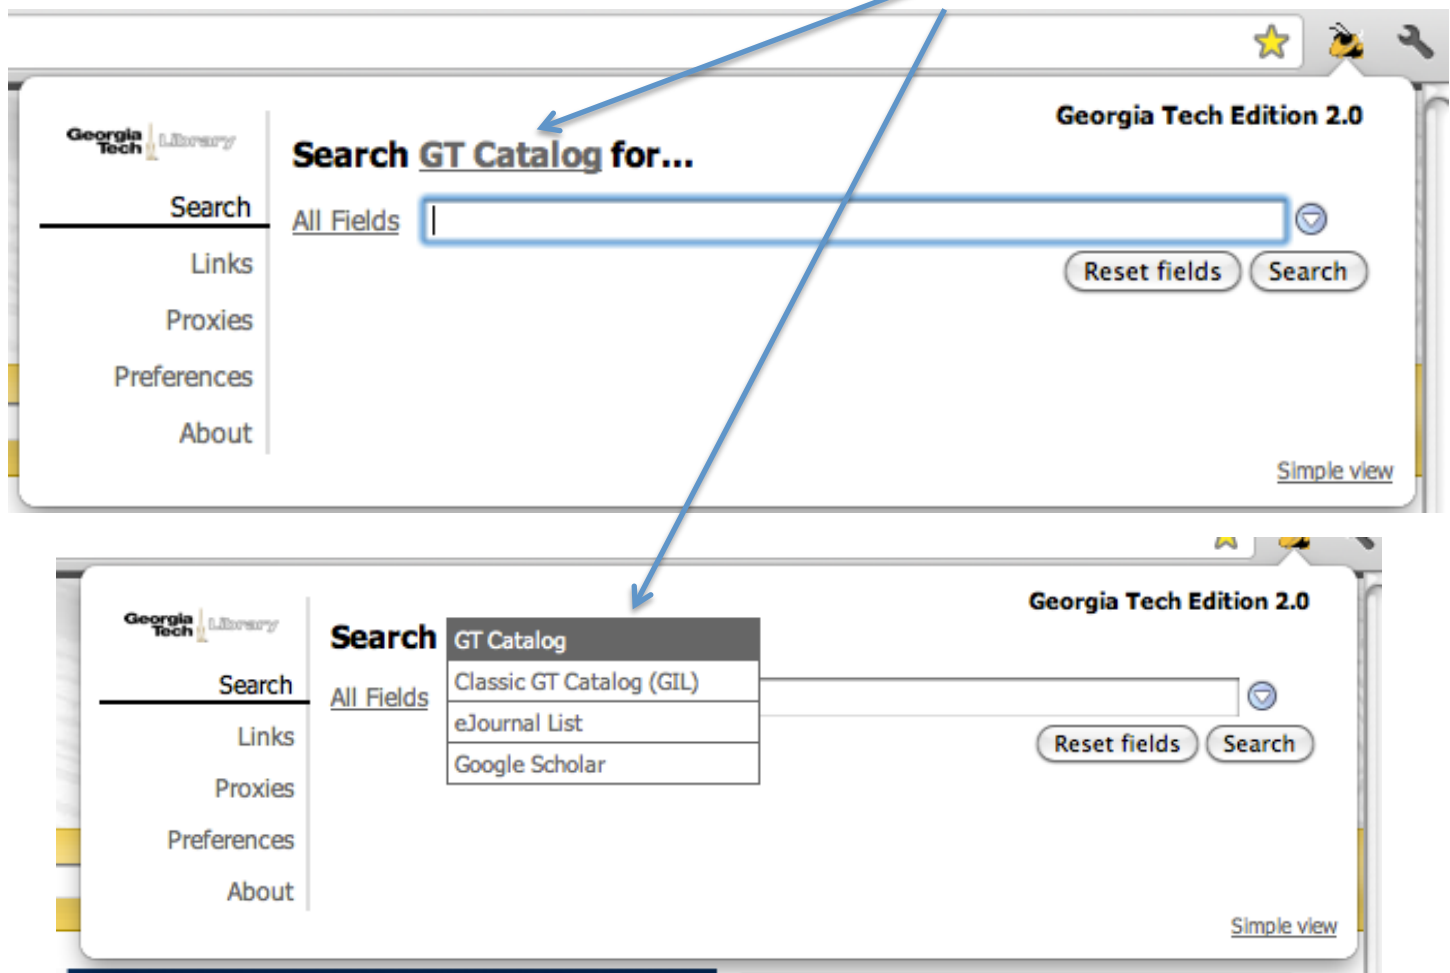

Simple view

Full view

To change between search options click on the hyperlinked text

To reload a page using the GT Library Proxy select the “Proxies” link

NOTE: This is a **beta** version. As LibX releases more documentation on 2.0 we will update our LibX GT web page: http://www.library.gatech.edu/search/web_localizer.php

If you have questions email: heather.jeffcoat@library.gatech.edu
